Application/Control Number: 10/697,637

Art Unit: 2834

## **DETAILED ACTION**

## Reasons for Allowance

1. Claims 1-5 are allowed.

## 2. Examiner's Statement of Reasons for Allowance:

Applicant(s) invention relates to a power-generating device, and more specifically, to a control of power generator output.

The system has a magneto generator with an AC/DC converter providing power to an accumulating means, an inverter for further converting voltage from accumulating means into AC voltage, and a controller to provide required controlling functions for the system processes and its characteristics.

There are inventions in the field that provide similar functionality and/or have similar features, as prior art of record shows. Applicant(s) invention differs from the prior art of record by the functional means of the controller, which control power conversion and inversion processes and their electrical characteristics to achieve required output parameters of the system, as disclosed and claimed, and which examiner's search failed to find.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
